Super Digital Signage

R E L E A S E N O T E S

Release notes

This document contains the release notes for RED-V Server ver. 14.04.A.

NEW FEATURES AND FUNCTIONALITIES

Videowall

Supports playout synchronization between RXV media players to create stunning videowalls with any layout, also with overlapping displays.

Player

Support for pictures with resolution up to 18 mega pixels by scaling down to 1920x2080 pixels.
Minor bug fixing.

Downloader

PriceChecker settings support.
Web Admin UI support Internet Update: it is now possible to perform an Internet Update without the need to connect a keyboard to the RXV players.
Report RED-V app versions to the RED-V server at start-up.

Launcher and Starter

Support for the Price Checker.
Support for Internet Update from the Web Admin UI.
