Super Digital Signage

RELEASE NOTES

Release notes

This document contains the release notes for RED-V Server ver. 15.04.A.

NEW FEATURES AND FUNCTIONALITIES

Weather Widget

Support new Weather service from OpenWeatherMap.
Search locations with auto-completion for an easier configuration.

Device Account Change

Auto-remove of devices from an account if the device is configured with a new Company account.

UTF-8 Complete support

Fixed support for non latin characters in all strings (resource titles, description, program names, etc.).
For example it's now possible to save resource titles and descriptions using Japanese characters.

Resource validity period

An image or video resource added to a playlist can be configured to be visible only during a specified period of time.
